

WS-400 Evo MANUAL SPRAY GUN

A BRIGHTER STAR

The **WS-400 Evo** from ANEST IWATA is an upgrade of the WS400 Supernova, designed by Pininfarina. The updated spray gun has several new features:

- New and improved easy release paint cup system
- Reliable and precise settings
- More combinations of paint nozzles

The **WS-400 Evo** is also available with the **HD-nozzle**. HD stands for *High Delivery* and means that you can spray a larger amount of paint during the same time, with a perfect result: even spray pattern and optimal atomization. A better and faster super star is born.

designed by *pininfarina*
